sceye SDK

Since 2008 we offer the option to integrate sceye deeply into own applications or to customize a process exactly to the needs of the customer.

Meanwhile over 200 partners have used our sceye SDK and we are proud on the great solutions which are created this way.

This OCX/.Net based SDK allows you a simple and quick integration to perform single scans.

We are pleased to offer the standard SDK licence free of charge. It comes with the most important basic features like autorotate, autocrop and the importent image enhancement capabilities.

sceye SDK (Basic)	
Type: OCX and .Net component • Access to device and status information (Serialno. connection status, etc.) • Full control over the hardware, laser, light, camera-arm closed or opened • All scan settings like dpi, color mode, filter and more • Autocrop and Autorotate are also available • Scan-to-file: scanresult will be saved automatically as tif or jpg file • and much more...	Developer license: free Runtime license: free Interested - let us know: service@sceye.eu

The Enterprise-licence of our SDK is available to be purchased and features superior functionality and extras for enterprise business cases.

sceye SDK (Enterprise)	
Type: OCX and .Net component • WTS support for larger businesses and enterprise solutions • Connect the sceye with the Windows terminal computer while the software is running on the server and all data is transfered quick (40 times faster then normal) and all automatic by using the RDP protocol. • Autoscan - for automatic recognition, capture and more. • You'll get an event as notification if a new document is placed below the sceye and ready to scan. • Direct Memory Access for faster results. • This accelerates the whole process by getting the image data directly.	Developer license: 4990,- Runtime license: free Ask us for details: service@sceye.eu
